

Interior Door Closer

*Premium
quality*

Silent

*Good
Design*

Concealed type

Retrofit type

Door closers ensure that doors are closed at a slow, quiet and safe speed while absorbing the impact of the door being closed.

What is the difference with hydraulic door closer

- Design** : The compact design enables a neat installation, even on interior doors.
Operability : When the door is opened, you get a light feel during operation.
Silent : Activated when the door is closed from an approximately 15-degree opening, the soft-close feature provides a luxuriously smooth and quiet motion.

Two types model as below

Concealed type

designed to be visible to visitors

- Applicable door weight : 15kg-40kg
- Cycle : 200,000 (30kg door)
